RUST PREVENTION VCI FILM

## TOUGH-AS-NAILS PROTECTION THAT DOESN'T BREAK THE BANK

Protect metal parts from the inside out with ARMOR DEFENDER™ VCI Film – it delivers more-for-less rust prevention that saves money, saves your metal parts and saves the planet! The DEFENDER keeps metal parts clean and corrosion free with its multi-layer construction that uses 25% less materials, conserves natural resources and offers cost savings without compromising high performance.

On the inside, the DEFENDER releases ARMOR's proprietary VCI Nanotechnology™ (a.k.a., our “secret recipe” of vapor corrosion inhibitor) to protect metal from rust and corrosion. On the outside, its tough physical barrier guards against rips, tears and the elements. Behind the scenes, the DEFENDER is innovatively engineered to optimize each layer of film for maximum rust prevention, moisture barrier protection, and puncture resistance at a cost that is 10-15% less than traditional, single-layer VCI film. ARMOR DEFENDER VCI Film – high performance rust prevention without the high cost.

## ARMOR DEFENDER FILM BENEFITS

- **ECONOMICAL:** 7-15% savings over mono-extruded film
- **EASY-TO-USE:** rust prevention & containment/barrier
- **CONTINUOUS PROTECTION:** up to 3 years rust-free protection
- **SAFE:** rust prevention free of oils, solvents and other harsh chemicals
- **SUSTAINABILITY:** contains a minimum of 30% recycled content; recyclable & in some cases reusable
- **ECO-FRIENDLY:** 25-30% source reduction over comparable films
- **INNOVATIVE ENGINEERING:** 3-layer design optimizes each layer and allows film to be downgauged
- **OPTIMAL VCI PLACEMENT:** VCI on the inside – closest to metal part
- **SEEING IS BELIEVING:** Bright Idea Technology™ provides visible proof of VCI

TAKING THE WORK OUT OF YOUR WORKDAY

## RUST PREVENTION VCI FILM

### USE LESS, WASTE LESS

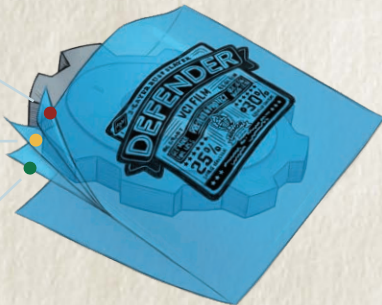

DEFENDER film is made of three layers that are co-extruded or “sandwiched together.” This unique design allows ARMOR to strategically position its rust-preventing VCI only on the inside layer -- closest to metal parts -- where it is needed most. In addition, the middle and outer layers provide an enhanced moisture and oxygen barrier, strength, and puncture resistance.

The real magic of ARMOR DEFENDER is not just that it is highly effective and cost effective, this VCI film can be downgauged (made thinner) by 25-30% without compromising performance. That is a 25-30% savings in raw materials and resources but with increased barrier protection and durability. ARMOR DEFENDER VCI Film is proof that you really can get more for less!

**OUTSIDE LAYER**  
strong, cost-effective barrier material

**CENTER LAYER**  
barrier material reduces oxygen and moisture

**INSIDE LAYER**  
VCI where you need it most
