

ARMOR-CLAD™

RUST PREVENTION VCI COATING

CORROSION FIGHTING YOU'LL BE "CLAD" YOU CHOSE

Turn your corrugated into a corrosion fighting fortress with ARMOR-CLAD Rust Prevention Coating. ARMOR-CLAD is a clean, safe, and easy to apply water-based liquid coating specifically designed for linerboard/corrugated applications. ARMOR-CLAD creates a thin, invisible, and long-lasting VCI layer on linerboard that will protect both ferrous and non-ferrous metals for years.

ARMOR-CLAD was created with coaters in mind – no need to slow your roll – we get that time is money! No clumping, foaming, separations, or swear words. ARMOR-CLAD won't build up on pans or rollers and will allow for quick clean-ups and changeover. This specific formula is designed for consistent coating weights on linerboard and will dry fast to avoid bottlenecks and headaches on the line. It runs like water (because it's water-based) but protects metal parts like an ARMOR-CLAD suit of, well... armor!

ARMOR-CLAD BENEFITS

- **INNOVATIVE TECHNOLOGY:** Water-based formula for clean and consistent coating specifically designed for linerboard.
- **EASY-TO-COAT:** No need to slow coating lines down for application or drying.
- **EASY-TO-USE:** Won't interfere with die cutting, folding, or gluing in secondary processes.
- **MULTI-METAL PROTECTION:** Prevents rust on ferrous and non-ferrous metals.
- **VERSITILE:** Can be diluted to fit nearly any process.
- **EXPERTISE:** For over 45 years, Fortune 500™ industrial companies have specified ARMOR for rust prevention.

ARMOR-CLAD

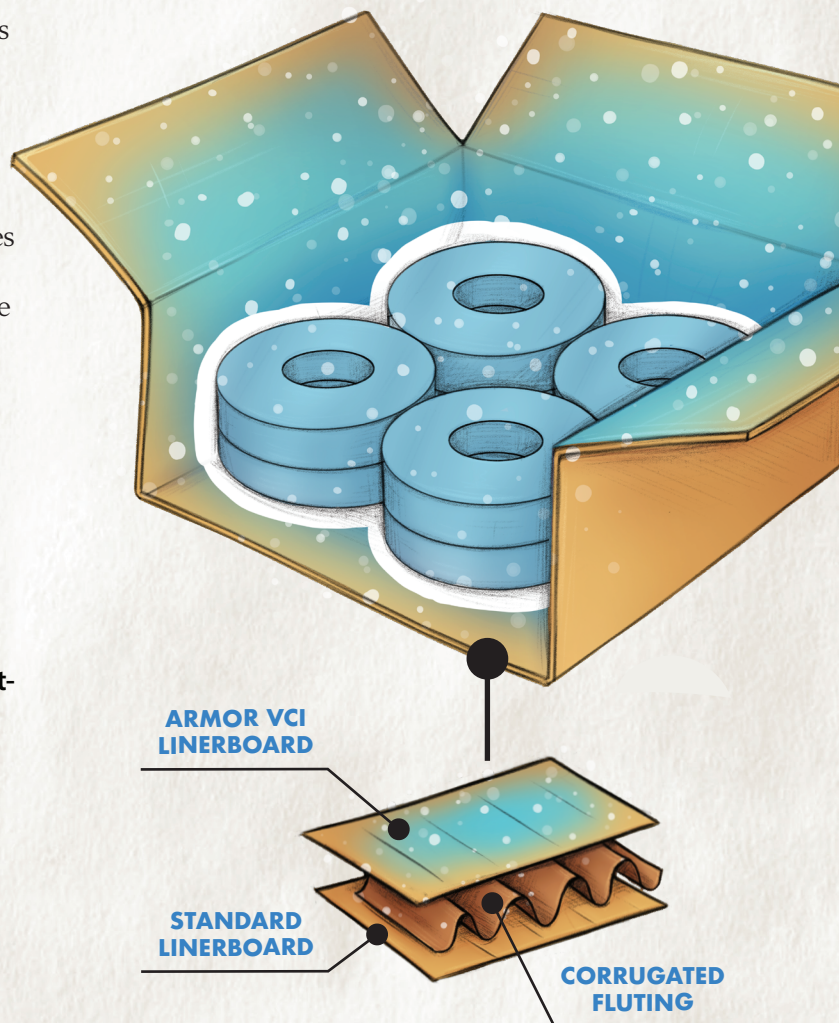

RUST PREVENTION VCI COATING

WHY YOUR CUSTOMERS NEED ARMOR-CLAD

Uncoated corrugated is naturally acidic, and acid means rust. Additionally, corrugated attracts and retains moisture, emitting it into the package - another corrosion ally. ARMOR-CLAD creates a pH-neutral rust busting barrier like nothing else. Metal parts not in direct contact with the corrugated? No problem! ARMOR-CLAD vapor corrosion inhibitor (VCI) volatilizes from the finished corrugated sheet or box to protect metals whether they are touching it or not. Eliminate the need for messy oils and greases and generate peace of mind, knowing that metal is being protected with ARMOR-CLAD.

KEY DIFFERENCES BETWEEN ARMOR-CLAD AND OTHER CORRUGATED VCI COATINGS:

- **TOTAL PROTECTION** – Works in vapor and direct contact.
- **CONTINUOUS PROTECTION**– Volatizes from corrugated for quick protection that also lasts for over two years, when properly sealed.
- **SUSTAINABLE** – Will not interfere with recycling and will protect metal parts from becoming scrap due to corrosion.
- **TRUSTED AUTHORITY**- ARMOR knows rust and since 1979 has been an expert in preventing it.
