

ARMOR METAL RESCUE BATH

RUST REMOVER LIQUID

EFFECTIVE RUST REMOVAL FREE OF HARSH CHEMICALS

Whether your company manufactures metal parts or receives them from a supplier, with Metal Rescue® Rust Remover BATH on the job, you can eliminate rust-removal outsourcing, metal reworking, or scrapping rusted or corroded metal entirely.

The water-based formula of Metal Rescue BATH removes rust without the hazards of harsh acids, offensive odors, or other caustic chemicals—there's no scrubbing, grinding, or sandblasting required. Instead, Metal Rescue removes rust through the “magic” of chelation technology, which surrounds the rust (iron oxide) during the bath or soak of metal parts and pulls it from the metal's surface. This is no hocus-pocus—Metal Rescue BATH is not only non-corrosive, non-flammable, and fume-free but also biodegradable after use.

Metal Rescue BATH is ready to use upon opening and works in three simple steps: soak, check, and rinse/dry. It does not harm other materials, including rubber, elastomers, plastic, vinyl, and clothing.

METAL RESCUE BENEFITS

- **WATER-BASED FORMULATION:** removes rust without harsh chemicals
- **USER-FRIENDLY:** odorless, non-flammable, and contains no solvents or VOCs
- **SIMPLE APPLICATION:** no scrubbing or sanding; just soak, check and remove
- **NON-ABRASIVE:** does not harm most etched, embossed, machined, or painted metal surfaces
- **ECONOMICAL:** eliminates outside rust removal services and costs
- **REUSABLE:** reuse until performance declines; 1 gallon can remove up to ½ lb. of dry rust
- **WIDE PRODUCT RANGE:** available in sizes of 1, 5, 55, and 330 gallons

ARMOR METAL RESCUE BATH

RUST REMOVER LIQUID

EASY, EFFECTIVE AND ECONOMICAL

For minimal-effort rust removal that does not require scrubbing, grinding, sanding, or other labor-intensive treatments, use Metal Rescue Rust Remover BATH. It effectively removes rust from both large and small metal parts, components, or assemblies. Metal Rescue Bath is hassle-free because it is ready to use—no mixing required—and it works in three easy steps:

- 1 SOAK:**
Clean the metal part(s) of any dirt, oil, or contaminants and soak in the bath.
- 2 CHECK:**
Check part(s) periodically (removal time varies based on the severity of the rust and the temperature of the liquid).
- 3 REMOVE:**
Once the desired results are achieved, remove the metal part(s), rinse, and dry thoroughly.

Metal Rescue BATH is fast-acting and reusable, and its results significantly reduce the costs associated with outsourcing, reworking, or discarding rusted metal parts.
