

ARMORSTRETCHFILM

RUST PREVENTION VCI FILM

SHIELD METAL PARTS FROM RUST THE EASY WAY

ARMOR POLY® VCI Stretch Film stretches beyond the limits of other films thanks to its added benefit of rust prevention. We combine polyethylene stretch film with ARMOR VCI Nanotechnology® (a.k.a., our “secret recipe” for vapor corrosion inhibitor) to create this two-in-one wonder wrap – a stretch film that also protects ferrous and non-ferrous metals from rust.

ARMOR POLY VCI Stretch Film is highly elastic, puncture resistant and prevents rust – simply use it to contain or enclose metal or metal parts and the ARMOR VCI comes to life to form a corrosion-inhibiting shield that repels rust. This is not your average stretch film – use ARMOR POLY VCI Stretch Film to wrap or bundle bulk metal parts or shipments securely with the added assurance that the film’s VCI is protecting the contents from rust and corrosion.

ARMOR POLY STRETCH FILM BENEFITS

- **EASY-TO-USE:** apply like standard stretch film around parts or pallet (note: metal must be enclosed or contained)
- **CLEAN:** environmentally friendly and recyclable
- **SAFE:** prevent rust free of oils, solvents or other harsh chemicals
- **ADAPTIVE:** film is strong, highly elastic and does not slip
- **FLEXIBLE:** wrap odd or oversized metal parts/equipment with ease
- **TWO-IN-ONE PROTECTION:** secures metal in shipment; VCI protects against rust/corrosion
- **SOLO OR TANDEM USE:** use alone or pair with other ARMOR VCI products for extended protection
- **SEVERAL OPTIONS:** available in various sizes and thicknesses

TAKING THE WORK OUT OF YOUR WORKDAY

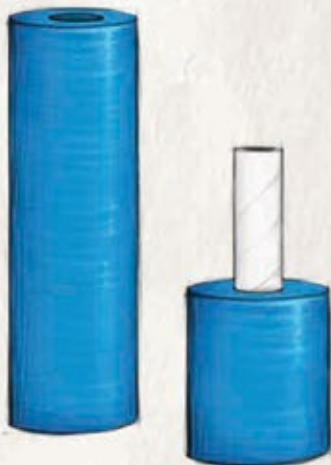

ARMORSTRETCHFILM

RUST PREVENTION VCI FILM

HEAVY DUTY, DOUBLE DUTY PROTECTION

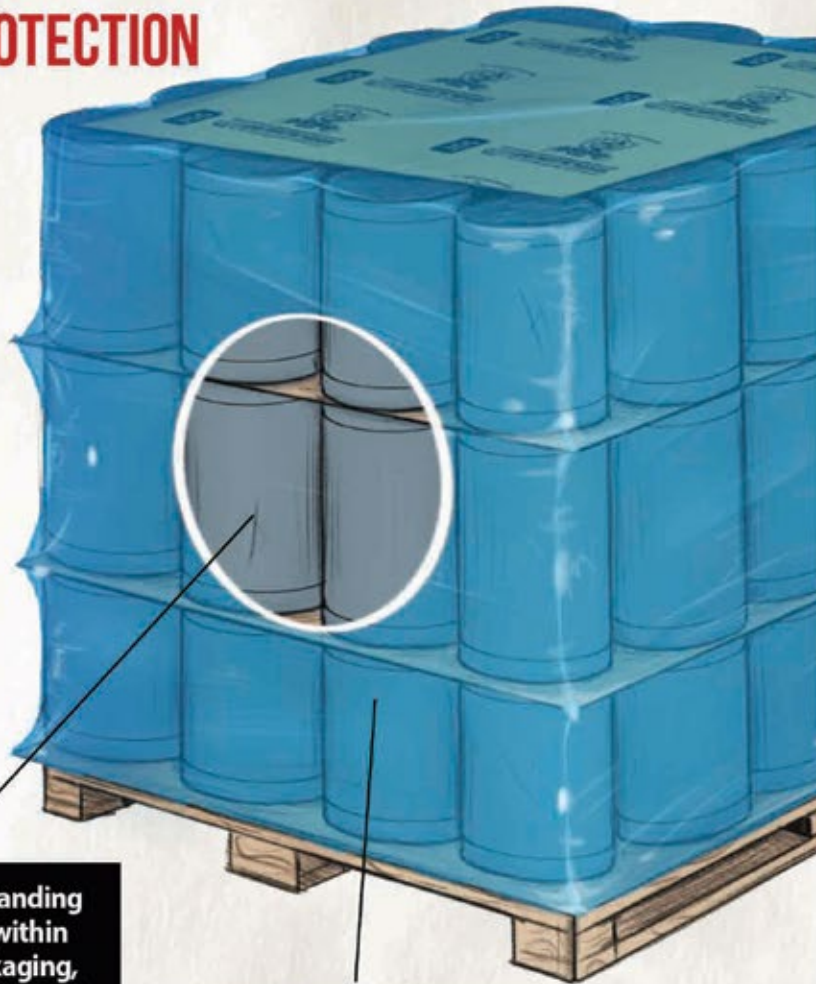

Upgrade your stretch film to the multi-tasking power of ARMOR POLY® VCI Stretch Film. Our film delivers double-duty metal protection – it physically secures metal parts for storage or shipment and it keeps them rust-free. Better yet, ARMOR POLY VCI Stretch Film saves both time and money over other wrapping methods and its VCI protection helps reduce metal reworking or salvage due to damage from corrosion.

ARMOR POLY VCI Stretch Film is environmentally friendly, recyclable and offered in a range of sizes and thicknesses. Use it, or our heavy-gauged, 5-inch VCI banding film, to secure, band or unitize metal parts; wrap or bind large equipment or metal coils; to serve as a barrier for metal cages or bins; or to replace VCI poly bags in various pallet configurations.

ARMOR Stretch/Banding Film releases VCI within the enclosed packaging, which forms a blanket of protection on the surface of metal to repel moisture and rust.

ARMOR Stretch/Banding Film provides an exterior protective barrier and it secures metal parts for storage or shipment.

All items on the Stock & Ready® product list are in-stock and ready-to-ship with no order minimums.

Stock & Ready® orders placed by 1 p.m. EST will ship by next business day.
