

ARMOR SHIELD DESICCANTS

MOISTURE CONTROL TO PREVENT RUST

RUST PREVENTION DESIGNED FOR THE LONG HAUL

With ARMOR SHIELD® Desiccants, the job of controlling moisture and humidity in the packaging or storage of metal parts is “no sweat!” Desiccants are like miniature dehumidifiers – they are drying agents that reduce moisture inside an enclosed space. Not only do they adsorb moisture, ARMOR desiccants actually hang on to it -- they do not release it -- the result is a packaging environment that remains dry over an extended period of time. Better yet, you can combine these powerful-pouches-of-moisture-control with ARMOR VCI Nanotechnology™ (our “secret formula” for vapor corrosion inhibitor) to keep metal parts rust-free and ensure that their storage or export is worry-free.

ARMOR offers a variety of desiccants to assist in any size project, options include Clay Tyvek®, Silica Gel Tyvek® or Clay Sewn Cloth, ranging from .5 grams to 2,500 grams, or calcium chloride for ocean containers. ARMOR also offers a combination desiccant and VCI emitter called the SMARTY PAK – it’s the deadly duo of rust prevention.

ARMOR SHIELD DESICCANTS BENEFITS —

- **EASY-TO-USE:** simply insert into packaging or hang in large containers
- **CLEAN:** even at full capacity, ARMOR desiccants do not change size, shape or texture
- **SIZED TO FIT:** .5 to 2,500 grams or ocean container desiccants capable of adsorbing 300% of its weight
- **SEVERAL/PRODUCT OPTIONS:** clay or silica gel for small-to-large packaging; calcium chloride for ocean containers
- **SOLO OR TANDEM USE:** use alone or pair with ARMOR VCI products for extended protection
- **SAFE:** prevent rust free of oils, greases, solvents or other harsh chemicals

TAKING THE WORK OUT OF YOUR WORKDAY

ARMORSHIELDDESICCANTS

MOISTURE CONTROL TO PREVENT RUST

DESICCANTS SIMPLIFY AND KEEP IT DRY

Keep it dry and tell rust goodbye with the help of ARMOR SHIELD® Desiccants. If your metal parts are in bins, totes, shipping crates or export containers, you can remove moisture, prevent rust and prolong their storage with desiccants.

Want to give your rust prevention a turbo boost? Combine desiccant with one of ARMOR's VCI paper or poly products. These products emit our special formula of VCI Nanotechnology™ and when the VCIs activate they form a blanket of protection on the surface of metal to repel rust. When ARMOR VCI and desiccants join forces, rust doesn't stand a chance.

ARMOR SHIELD Desiccants can be used in any size enclosed package from small bins up to large shipping crates or export containers.

Application is easy – desiccants can be hung or inserted into packaging to remove moisture.

All items on the Stock & Ready® product list are in-stock and ready-to-ship with no order minimums.

Stock & Ready® orders placed by 1 p.m. EST will ship by next business day.
