## RUST PREVENTATIVE COATING

## OUTDOOR RUST PREVENTION TO CONQUER THE ELEMENTS

ARMOR Weather Warrior™ is a water-based, outdoor rust preventative coating that shields and protects metal parts and equipment from Mother Nature's harshest conditions. Once applied, Weather Warrior dries quickly to form a heavy-duty, wax-like barrier coating on applied surfaces that displaces moisture. It is heat stable and does not transfer, abrade or run. Come rain or shine, Weather Warrior provides up to 9 months of outdoor protection. While the Weather Warrior formulation is tough enough to withstand the elements, it contains no toxic or harmful materials, no VOCs and it will not harm most elastomers plastics or painted surfaces. Weather Warrior delivers the highest level of corrosion-resistance possible from a water-based coating; it is premium rust prevention that weathers the storm.

## ARMOR WEATHER WARRIOR BENEFITS

- **CLEAN:** water-based formula eliminates oils, solvents and other harsh chemicals
- **SAFE:** non-flammable; contains no toxic or harmful materials or VOCs
- **EASY-TO-USE:** one-coat application via spray, dip or brush
- **CONTINUOUS PROTECTION:** outdoor storage – approx. 9 months & indoor storage up to 2 years
- **FAST DRYING:** dries-to-the-touch in 20 minutes in ambient conditions
- **SIMPLE REMOVAL:** use detergent or common alkaline cleaner
- **LARGE-SCALE USE:** ideal for large/oversized equipment/metal parts
- **HEAVY-DUTY:** formulated to withstand harsh outdoor environments
- **SEMI-TRANSLUCENT:** forms a wax-like barrier that displaces moisture
- **ORDER OPTIONS:** available in 5, 55, and 275-gallon sizes

## RUST PREVENTATIVE COATING

### RUST PREVENTION THAT IS A FORCE OF NATURE

Weather Warrior's ironclad umbrella of protection is formulated to keep metal parts rust-free while in storage or transit. With just one application, coated surfaces are safe from the ravages of outdoor exposure to heat, cold, rain, snow or salt water.

Weather Warrior's proprietary corrosion inhibitor penetrates quickly to form a semi-translucent, wax-like coating that adheres to the surface of metal to displace moisture. Removal is easy using detergent or common alkaline cleaners found on the market.

In standard performance testing, ARMOR Weather Warrior's corrosion-resistant coating protected metal for more than 2000 hours of exposure inside a humidity chamber and more than 336 hours in a standard salt spray performance cabinet. When it comes to rust prevention, Weather Warrior is one powerful force of nature.
