

VCI CORRUGATED PLASTIC

RUST PREVENTION PACKAGING

VCI CORRUGATED PLASTIC PACKS A RUST-PREVENTION PUNCH

Armor Protective Packaging® and Primex Plastics Corporation have come together to create a new type of corrugated plastic packaging with the added benefit of rust prevention called Prime-Cor-X® protected by ARMOR. Protect your metal parts from damage and corrosion in production, storage, or transport, with this strong, versatile, lightweight yet durable vapor corrosion inhibitor Corrugated Plastic -- it's a rust-prevention packaging powerhouse!

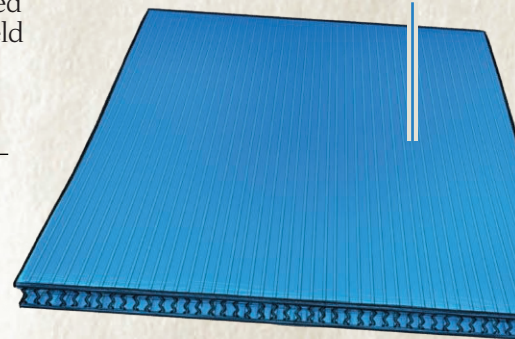

Prime-Cor-X® protected by ARMOR is available in both polypropylene and polyethylene. These materials are extruded into a three-layer structure with a ribbed or fluted center layer sandwiched between two flat, outer layers. This design provides enhanced stability, rigidity, and creates air pockets that cushion and absorb shock during impact.

To prevent rust, ARMOR VCI Nanotechnology™ (aka, our proprietary formula of vapor corrosion inhibitor) is added to the polypropylene and polyethylene during the manufacturing process. When metal parts are placed or enclosed in VCI Corrugated Plastic, its rust-preventing vapors are released and they form an undetectable shield of protection on the surface of metal that is clean, safe and blocks rust.

VCI CORRUGATED PLASTIC BENEFITS

- **EASY-TO-USE:** sheets, partitions, bin liners, or fabricated into bins, boxes or totes
- **SAFE:** rust prevention free of oils, solvents and other harsh chemicals
- **CLEAN:** non-fibrous and leaves no residue
- **DURABLE:** moisture, weather and chemical resistant
- **STABLE:** corrugated flute layer provides enhanced strength and rigidity
- **LIGHTWEIGHT:** easy to store, lift, assemble and does not drive-up shipping costs
- **ECO-FRIENDLY:** reusable and 100% recyclable

RUST PREVENTION PACKAGING

CLEANER, GREENER RUST PREVENTION PACKAGING

Prime-Cor-X protected by ARMOR keeps metal free of rust and corrosion, which isn't just good for business, it's a win for the environment too. VCI Corrugated Plastic is sustainable packaging and that makes for a cleaner, greener world and here's why:

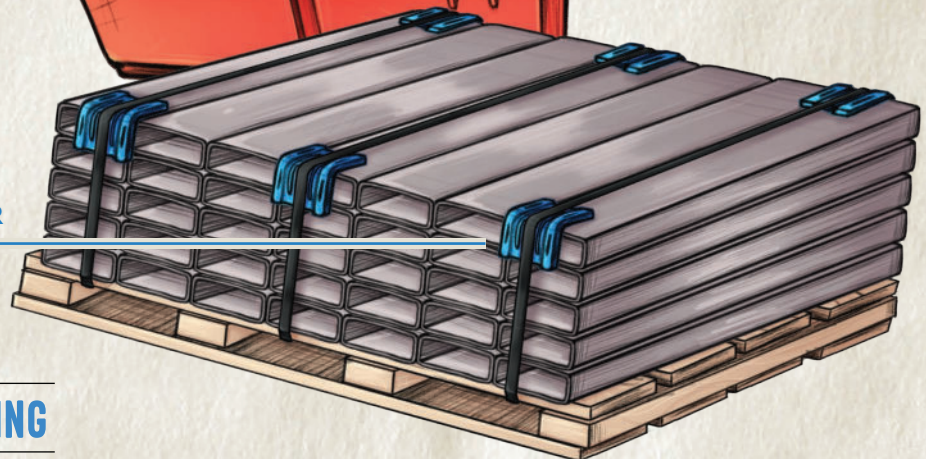

- 1 RESOURCE CONSERVATION:** Keeping metal clean and rust-free preserves the natural resources and energy required to manufacture new metal
- 2 REDUCE:** VCI Corrugated Plastic replaces the use of multiple rust prevention products, saving materials, resources and reducing waste
- 3 REUSE:** VCI Corrugated Plastic is strong, durable and reusable, reducing the need for replacements/minimizing waste
- 4 RECYCLE:** Made from 100% recyclable polypropylene or polyethylene
